CS 346: Meeting Minutes

Date: __Feb 10__   Team: __214__

Present: All members (Yang Ji, Hammad Khan, Tim Chung, John Chung)

Absent:

Agenda
- Go through some goals of sprint one, what core features we want completed and who wants to tackle the features based on availability for sprint 1

Notes
- Yang has a CS341 midterm next Fri so with availability, assign him some of the "shorter" tasks
- Tim offered to attempt creating the console app, so give him that one

Decisions
- We decided to complete core infrastructure first, console app, installer, starter unit tests etc.
- John and Hammad offered to start the GUI app, main goal is to get a working create note function + menubar and maybe some homepage UI

Actions
- Issues created on GitHub and assigned to respective members

- Looked for some pair programming plugins on kotlin

- Based on availability, tried to work around what each person should be doing
